- AMERICAN ARBORVITAE. Also called White Cedar. Excellent for hedges and windbreaks. Dark green foliage. May be pruned back to any desired height. Prefers moist soil.
- SIBERIAN ARBORVITAE. Symmetrical, compact grower. Dark green foliage. Matures at 6 to 8 feet. Requires good moist soil.
- GLOBE ARBORVITAE. Dense, dark green foliage. Round compact form. Matures at 3 to 4 feet. Good soil.
- PYRAMIDAL ARBORVITAE. Pyramidal shape. Valuable for formal plantings. Grows to 15 to 20 feet. Rich soil.
- RED CEDAR. Pyramidal shape. Bright green foliage. Conical growth. Moist soil.
- PLUME CYPRESS. Symmetrical, fragrant. Flat blue-green needles. Prefers medium to heavy soil and will thrive in shade.
- BALSAM FIR. Blue-green needles. Pyramidal growth. Needs moist soil.
- CONCOLOR FIR. Soft dark green to gray-blue needles. Rapid grower. Medium soil.
- DOUGLAS FIR. Shining dark green leaves with white bands underneath. Rapid grower. Medium soil.
- FRASER FIR. Shining dark green leaves with white bands underneath. Grows to about 70 feet. Medium to moist soil.
- CANADIAN HEMLOCK. Lacy, graceful foliage—easily pruned. Prefers shade, but will live in sunlight. Moist soil.
- SAVIN JUNIPER. Low bushy type. Excellent for foundation planting. Good rich soil.
- PFITZER'S JUNIPER. Broad, bushy habit. Grows in either shade or sun. Bluish-green foliage. Very popular for foundation work. Good soil.
- GREEK JUNIPER. Dark, bluish-green foliage. Pyramidal growth. Rich soil.
- IRISH JUNIPER. Pyramidal shape. Gray-green foliage. Good soil.
- ANDORRA JUNIPER. Distinguished for its grayish-green needles. Low, spreading growth. An unusual purplish color after the frosts in the fall. Low, spreading growth. Height about 15 to 18 inches. Medium to rich soil.
- EUROPEAN LARCH. Bright green feathery foliage. Deciduous. Prefers moist soil. Slender, pyramidal form. Very fast growing.
- JAPANESE LARCH. Similar to the European type but not as pyramidal in shape. Very fast growing. Deciduous. Moist soil.
- AUSTRIAN PINE. Vigorous grower. Long dark green foliage. Will thrive in dry sandy soil. Best variety for seashore planting.
- JACK PINE. Slender, spreading branches forming a broad open head. Thrives in sandy soil. Trees present a picturesque aspect.
- RED PINE. Dense foliage. Beautiful, long deep-green needles. Rapid growing. Will thrive in dry soil.
- SCOTCH PINE. Rapid growing and very ornamental. Light gray-green foliage. Will grow in poor soil and adverse conditions. Good for screens where quick growth is desired.
- MUGHO PINE. Dwarf, slow growing. Hardy everywhere except in wet soils. Velvety blue. The handsome ungrated, short-leaved tree, native of Colorado.
- BLACK HILL SPRUCE. Very compact tree of pyramidal growth. Grows to a height of 20 to 30 feet. Prefers medium wet soil in shade from slightly blue-green to maroon.
- COLORADO BLUE SPRUCE. Ranges in shade from blue to steel-blue. Flowers purple. Grows in any soil. Prefers sunlight.
- ENGELMANN SPRUCE. Leaves blue-green to steel-blue. Flowers purple. Fully as beautiful as the Colorado Blue Spruce but not as widely known. Fully moist soil.
- NORWAY SPRUCE. Graceful, symmetrical tree of rapid growth. Pendulous branches, dark green foliage. Makes excellent hedges and windbreaks. Fully heavy soil.
- WHITE SPRUCE. Upright and symmetrical. Will stand clipping and pruning. Makes good hedges and windbreaks. Good soil.
- JAPANESE YEW. Very hardy. Matures at 5 to 8 feet. The spreading type is excellent for foundation plantings, and the upright form is recommended for formal or specimen plantings.

Japanese Yew

Blue Spruce

EVERGREEN FOUNDATION PLANTING

• OUR TREES ARE GUARANTEED TO LIVE  
AND COST NO MORE

- They are guaranteed because they have been transplanted every two years. Because this transplanting produces an abundance of fibrous roots which you do not find on trees which have not been properly transplanted.
- Because they have been started in our rigorous climate and have withstood temperatures of 50 degrees below zero to 100 degrees above zero.

We intend to stay in the Nursery Business. We want friends and satisfied customers. We offer you only the best trees—trees that will live.

## PLANTING AND CARE

WESTERN MAINE FOREST NURSERY

OUR POLICY  
of fair dealings with our customers has built our business from an output of 20,000 trees ten years ago to an output of 2,000,000 trees in 1935.

Five trees of the same kind and size at the 10 rate, 50 at the 100 rate. All prices on this page are F. O. B. Fryeburg, Maine. Orders shipped C. O. D. providing payment of one-half the amount accompanies the order. Shipping

Every tree sold by us from this price list that does not live will be replaced absolutely free of charge. Notify us of the number of dead trees you have, if any, before October 1, 1936. Shipments of replacements will be made by parcel post prepaid.

We do our part. YOU must do yours to make your trees live. Get them promptly from the express company. Unpack and plant immediately.

DO NOT LET THE ROOTS DRY
